ID Care is committed to providing state-of-the-art care and working together with patients to achieve the best health possible.

PATIENT INFORMATION

Patients receive care and instructions at the **ID Care's** Office Infusion Center (OIC) as an option to receiving intravenous therapies.

The OIC is conveniently located in the physician's office and patients return according to individualized treatment plans to have blood work drawn, dressings changed, and to undergo evaluation by the care team and physician. Office Infusion Center care allows patients to receive on-going medications and supplies along with treatment success.

The OIC provides privacy for the patient while allowing the nurse to observe each patient during treatment. Our patients receive care in a convenient setting with comfortable recliner chairs.

INFUSION CENTER THERAPIES

- IV antibiotics
- IV antifungals
- IV antivirals
- IVIG and Sub-Q Ig
- Other biologic therapies

INFUSION CENTER SERVICES

- Care plan oversight and counseling
- Lab draw and lab work monitoring
- Pharmacokinetics
- Pharmaco-economics
- Preparation and administration or distribution of ordered medications, supplies and equipment
- Central line catheter maintenance and care
- Outpatient therapy monitoring
- Many other FDA approved parenteral medications
